

## THE WORLD OF SOCIETY.

Dinners and Parties the Leading Events in Helena Circles the Past Week.

Progressive Lunch Party on the East Side and a Dance at the Broadwater.

Helena People Entertained by the Drum Cannon Mass Club-The Week's Marriage- Personal Mention.

We live in a progressive age, and the social world is always on the quiver for some new fad wherewith to satisfy that craving for excitement which asks no remission. Progressive encephalitis has had its day. It never was a very exciting amusement, but afforded temporary relief from what is called the "dullness" of the mind. The prizes were an additional inducement, and furnished the more talented with an opportunity to display their skill in getting up hand-painted devices, calculated to increase the duty on imported chinaware if they served no other purpose.

The word progressive might, of course, be applied to any amusement, and a progressive german could be easily arranged, the lady and gentleman receiving the most favors to take first prize, and the booty prize to be awarded to those favored the least; but when a progressive lunch was announced in Helena the questions naturally arose, how are prizes to be awarded? and what height of gourmandism would it be necessary to attain in order to successfully compete in such a test of dyspeptic endurance? On Friday night, however, all doubts as to the question were dispelled, and those fortunate enough to be invited enjoyed a novel yet at the same time very agreeable repast at Mr. Joe Davis' house, while all agree that a progressive lunch is very much more amusing than a formal dinner party.

Exactly why a twelve course repast commencing with bouillion and ending with black coffee should be called a lunch is not very clear, but the absence of wine probably precluded the possibility of its being christened a dinner. On arriving the gentlemen present, consisting of Messrs. S. Braden, H. Walker, G. H. Blair, W. Bradshaw, W. S. Kelley, M. A. Meyendorff, R. A. Harlow, A. M. Thornburgh, J. Davis, T. Sharpe and H. Kane were each presented with a card designating the table at which they were to sit, or rather upon which they were to commence operations. There were in all six tables, each presided over by a married lady. Every table was lettered, the letter being represented by a floral design arranged as a centerpiece. The married ladies present were Mrs. A. C. Botkin, Mrs. Judge Bache, Mrs. Don Davenport, Mrs. W. Humbert, Mrs. Hervey Barbour and the hostess herself. When seated each gentleman found himself vis-a-vis to a young lady who for two courses remained his partner; that is he ate one course with her at the first table and the next was partaken together at an adjoining table, after which he passed on and one remained and was in turn escorted by the next corner. The married ladies never moved, and a tap of the bell was the signal for the change of destination. The young ladies present were Miss Minnie Flanagan, Miss Bethwell, Miss Annie Flanagan, Miss Briscoe and Miss Herschfeld. Yager's band discoursed sweet music throughout the entire entertainment which began at 6 p. m. and lasted until 9:30 p. m. when, after an impromptu dance, the guests dispersed.

Of course such an entertainment has its drawbacks. A girl may have an interesting conversation with a gentleman, and yet not know his name, and a gentleman may have a very interesting conversation with a lady, and yet not know her name. Again, a man may, owing to an interesting tete-a-tete, have neglected to pay much attention to some tempting delicacies before him, and in both these cases it would seem hard to have the changes abruptly rung upon you; but it is something new and will doubtless prove popular.

Another interesting event which took place during this past week was the dance on Wednesday night given at the Hotel Broadwater by Miss Antoinette Chumassero to a select circle of friends. The guests were received in the private parlors of the hotel by Miss Chumassero, Mrs. Chumassero and Mrs. Broadwater. The party was given entirely to the younger set, married people not being invited. The evening being cool, the temperature of the dining room was perfect. The programme consisted of sixteen dances, and the dancing cards were extremely artistic in design and finish. Rosner furnished the music which was noticeable for its excellence, and the introduction of some new and very pretty dance music. The supper served at mid night was fully equal to the high standard already established by this popular hostess, while the spacious corridors of the hotel afforded ample opportunity for promenading and tete-a-tete, which added greatly to the enjoyment of the evening. Among those present were: The Messrs. Chumassero, Flanagan, Blaine, Blair, Franklin, Phillips, Rothwell, Clarke of Butte, Hoag, Stephen, Burke, Fisk, Bache and Mrs. Cooke, of Chicago, McClock, Greenleaf and Markow, and the gentlemen, Messrs. C. H. Hill, H. S. Sharpe, S. Carpenter, Chas. Power, W. Bradshaw, M. A. Meyendorff, Allen Wheeler, F. Jones, J. P. Reed, R. A. Harlow, W. C. Gibbs, W. S. Kelley, Adkins, Walker, Prosser, G. H. Palmer, W. S. Kelley, Geo. Child, J. W. Sanders, R. A. Luke, A. M. Thornburgh, E. C. Russell, Purcell, Metten, W. Carpenter, S. A. W. Herbert, L. E. Thompson, E. Burns and L. N. McIntyre.

The prevailing sentiment is that the Hotel Broadwater parties have spoiled Helena society and that in case of the reorganization of dancing clubs and the giving of a special party at the Hotel Broadwater, the hotel's dining room floor will satisfy the now enlightened "society" of its members. The Marysville dance on Friday night caused an exodus of very much the same sort, about forty people taking the special train for the Northern Pacific about 7:30. The dance was given by Messrs. Dr. King, J. B. Hodson, F. W. Bacon, E. E. Goodell, J. Astley, E. L. Whitmore, and W. B. Brown, all members of the Drum Cannon mass club. Warren Hall was beautifully decorated and lit by electricity kindly furnished for the occasion through the courtesy of Mr. Bayless. Everything went off in an excellent style, the waxed floor proving capital, while the dance music furnished by Rosner gave excellent satisfaction. Mrs. Braden chaperoned a large party from Helena. Among those present were the Messrs. Flanagan, Blaine, Knight, Fisk, Herschfeld, Davenport, Carpenter, Phillips, Greene, and among the ladies of Marysville present were: Mrs. and Miss Kolb, Mr. and Mrs. Mayger, Misses Dearing, McKelvin, McLeod, Davis and Winston. The Helena contingent included Messrs. J. Reed, G. Harboure, Kane, S. Braden, R. King and others who helped to swell the Marysville party, making a very pleasant social event. Supper was served about midnight and proved not only ample in quantity but very inviting, and the Helena party returned about 3 a. m. thoroughly satisfied with the trip and their evening's entertainment. The one drawback was the unavoidable absence of Mrs. Bayless who had left for the east and whose presence was greatly missed. The arrangement of the electric lights was extremely pretty and reflected great credit on Mr. Brown who devised it.

**Marriages, Past and Prospective.**  
The wedding of Mr. George Major and Miss Grace Barnham, which took place on Tuesday evening at the residence of the bride's sister, Mrs. James R. Harris, was a very interesting event and Mr. and Mrs. Major will take with them to their new home in Missoula the good wishes of the numerous friends they leave behind.

On the same evening, at the residence of

the bride on Davis street, Mr. F. W. Feetum was married to Miss Katy N. Bennett, the Rev. Dr. Raleigh officiating.

On Wednesday evening last Al. Marshall, the janitor of the U. S. Assay office, was united in marriage to Miss Annie L. Johnson, of this city, which proved a very fashionable event in colored social circles. On Thursday afternoon, October 17, at 4 o'clock, at the First Congregational church of Salt Lake City, Miss Antoinette Sagar, of Salt Lake City, and Mr. James Bradish Wells, of this city, will be united as man and wife. Mr. M. A. Meyendorff will officiate as best man, and a reception will follow at the home of the bride's parents, No. 337 South Main street, Salt Lake City. Numerous invitations to this joyous event have been received in this city, where both the contracting parties are well known and universally esteemed, but distance in this case cannot lend enchantment to the view, and we can only await the return of Mr. and Mrs. J. B. Wells to this city to tender their congratulations which are so freely expressed.

**Personal and General.**  
The many friends of Mrs. Robert Sale Hill in this city will, I am sure, regret to hear that following so closely on her father's death comes the sad intelligence that her younger sister, Miss Florence Foote, died suddenly on Thursday last, at the family residence, 49 Fifth avenue, New York City.

On a large party are going east via the Montana Central to-day, viz: Mr. and Mrs. Quigg, Mr. and Mrs. W. A. Clarke, Mr. R. A. Harlow, Miss Minnie Flanagan and Mr. J. P. Reed.

Mr. Jewett, a brother of Mrs. H. R. Buck, and a very promising architect, is at present visiting his sister and intends making Helena his home.

Judge and Mrs. Bache have rented Mrs. J. P. Reed and Mr. Herbert Nicholson's new house for the winter months.

Mrs. Braden expects to leave for California very shortly to pay her son, Eugene Braden, a visit.

Mr. Geo. Child has been quite ill and confine to the house, but is now convalescing.

Mrs. C. A. Lombard, of Monroe, Wis., is the guest of Mrs. C. W. Cannon.

Mr. B. F. Fox will arrive in Helena on Tuesday next.

Miss Mary Reed arrived from the east last week.

Mr. R. Floyd Jones is expected home to-day.

J. S. Tooker has left for the east.

BESKING.

NEW ZEALAND'S BIG TROUT.

Fish Which Weight Twenty-Eight Pounds and Plenty of Them, Too.

There are several rivers in New Zealand—mostly in the middle island—where for some reason not clearly ascertained, the trout grow much more rapidly and to a larger size than elsewhere. One of these is the Ophiti, in South Canterbury, on which is situated the picturesque village of Temuka. I have myself seen an honest brown trout caught there weighing 28 pounds, and a finer or better fish I never saw. I have known 40 pounds of trout killed in the Ophiti with one rod in a single evening, and not a long evening either, for darkness falls very suddenly in those latitudes. In the same river fish weighing 20 pounds have been taken and eaten and found delicious. I happen to know the country about there well, and I attribute the great size and good quality of the trout in the Ophiti to the fact that the river, which rises in the snowy mountains, does not flow into the sea at all, but into a large, deep lagoon, many miles long, which only breaks out into the sea at flood times, though the sea water penetrates into it through the shingle bank, or flows over into it during stormy weather. The lagoon is, in fact, like an enclosed arm of the sea, and is alive with little fish, crabs and all sorts of marine and semi-marine creatures. Here the trout can get any quantity of food, and from the depth and saltness of the water, they develop some of the characteristics of marine life, the red flesh and large size, without being exposed to the ravenous attacks of the sealish. The Mataura, in South Otago, another snow river running into a lagoon, has trout as large as those in the Ophiti. A friend of mine who is a true angler, Mr. Alexander Ferguson, manager of the national bank at Christchurch, Canterbury, to whom I applied for some authentic particulars of sport during the season just over, wrote to me to follow me to America, as follows: "Brown trout weighing twenty pounds and upward, have been landed from rod and line from streams both in the north and south of Canterbury during the past season. On the Selwyn, a stream fifteen miles from Christchurch, three rods killed twenty-one fish weighing 144 pounds, on the 17th of December, with natural bait (bull-head and small fish indigenous to the river). On the same day two rods killed sixty-one trout, weighing 44 pounds, with artificial fly, in a stream flowing into the Selwyn."—Forest and Stream.

THE ENGINEER TO BLAME.

Miners Killed and Injured in a Pennsylvania Railway Accident.

PITTSBURGH, Oct. 12.—A collision occurred near Bridgeport, Ohio, this morning, between a train conveying about seventy miners to the Wheeling coal works and a freight train. The passenger train and a portion of the freight train were demolished. David Moore, a miner, was killed, four others fatally injured and about twenty more seriously injured; none of the latter, however, will die, their injuries being confined to bruises and slight fractures. The accident was caused by the failure of the engineer of the freight train to obey orders. He had been instructed to wait at the mines until the coal train arrived, but instead pulled out for Bridgeport.

The Admiral Was Wrong.

OTTAWA, Oct. 12.—The dominion government after fully investigating the recent insult offered by Admiral Heneage in forcibly towing a German ship from her anchorage in the harbor of Esquimaux, has to-day communicated the result to the British government, censuring Admiral Heneage as having acted in a manner which was a gross violation of his duty and being guilty of a grave misbehavior, which calls for reproof. The minister of marine reports the admiral had no jurisdiction whatever over the port of Esquimaux, and that the German ship had the right to anchor wherever the captain saw fit, and it is believed in official circles here that Admiral Heneage will immediately be recalled from command of the Pacific squadron and that the British authorities will at once offer an apology to the German government.

No Danger From the King.

Boston, Oct. 12.—The Traveler prints, under the date of Seoul, Korea, September 8, a letter from Mrs. Heron, wife of Dr. Heron, of Tennessee, who was reported sentenced to death by the king of Korea for teaching Christianity. Mrs. Heron had just recovered from a dangerous illness. She says the king would not do what has been charged against him, and adds that his only danger is from the ignorant and superstitious lower classes. She says neither she nor her husband are teaching Christianity, as it has been expressly forbidden. They live in hope of a treaty revision which will allow them to do so.

A Woman's Face Is Her Fortune.

After a few days' use will permanently remove all blotches, Moles, Pimples, Freckles, producing an Entrancingly Beautiful Complexion that shames the use of powders and creams. Guaranteed perfectly harmless. Sold by all leading druggists at 25 cents per box of 100 wafers. Dr. Simms' Safe Periodical Wafers are safe and reliable for all female irregularities. Price 25 cents per box. Sent by mail (secure) on receipt of price. Warranted to contain no "Tansy" or "Penny" herbs.

Dr. Simms' Safe Periodical Wafers.

**Lewis Must Answer the Charges.**  
WASHINGTON, Oct. 12.—Secretary Blaine has called William Baird Lewis, United States Consul at Tangiers, to appear at the state department, Washington, and meet the charges of corruption made against him by Benezel, a Moroccan merchant. Benezel claims all the way from Tangiers to pre-fer the charges. Lewis was a member of the Solomons, American members of the Alliance of Israelite Universal, accompanied Benezel before Secretary Blaine, when Benezel yesterday entered the complaint.

## A NEW NAVAL TERROR.

England's Latest Supply Ship—A Quick Fighter and a Fast Sailor.

A new acquisition to England's navy was launched recently and christened the Vulcan. She is designed as a twin-screw torpedo-deposit ship, but is a fast, protected cruiser and a formidable fighting craft as well and represents an entirely novel type.

The construction of the Vulcan was begun on June 15, 1888. She is of 6,620 tons displacement—larger, in short, than any of the large Indian troop ships and three times as large as many a cruiser. She is built of steel, her hull alone weighing 3,170 tons, and her principal measurement are as follows: Length, 350 feet; beam, 68 feet; mean draught, 22 feet. The vertical keel is of an unusually heavy and substantial character and is 3 feet 6 inches high. The cast-steel T-shaped sternpost is extra strong, weighing five tons. The vessel is divided into numerous water-tight compartments, and is protected by a continuous steel deck 6 inches thick in the slope and 24 inches elsewhere. The engine is of the triple expansion type and will give a collected indicated horse-power under forced draught of 12,000. They will drive the ship at a speed of 20 knots (23 miles) and 18 knots (20.7 miles) at sea. There will be storage for 1,000 tons of coal, an amount sufficient for 3,000 miles steaming at 18 knots an hour. She will have a balance rudder similar to that fitted to the Spanish cruiser Reina Regenti and to the Italian steamer City of New York. This will enable the new war ship to turn a complete circle of not more than 90 yards in diameter in little over three minutes.

As a torpedo deposit ship she will be admirably adapted for the work. She will be a floating factory, full of forges and workshops for the repair of torpedo-boats and torpedoes. She will carry an immense supply of torpedoes, submarine mines and all the necessary gear for submarine work on a large scale, and she will also have upon her decks a small flotilla, probably eight in number, of second-class torpedo-boats of the largest size. These she will be able to hoist overboard and despatch in all directions at a few minutes' notice.

The Vulcan will also have a torpedo armament of her own, consisting of six launching tubes, some of which are to be under water. Regarded more particularly as a cruiser, she will possess qualities which will enable her to rank among the most formidable unarmored cruisers of the world. She will have weapons, which at close range will be capable of penetrating armor up to nearly sixteen inches thick. The quick-firing armament will be the most powerful of any ship in the world. It will enable her to discharge on each broadside a storm of eighty to one hundred and fifty projectiles a minute, and should she ever be attacked by armored cruisers or torpedo-boats, she would be able to give them a warm reception.

Will Represent the Pope.  
New York, Oct. 12.—Among the cabin passengers on the City of Rome, which arrived this morning, was the Right Rev. Dennis O'Connell, rector of the American college at Rome. He will represent the pope at the centennial of the American Catholic hierarchy on November 10, and in the Catholic congress on November 11 and 12 at Baltimore. He will also attend the opening of the great Catholic university at Washington, Nov. 13.

Will Visit the South.

WASHINGTON, Oct. 12.—The secretary of state has received many invitations for the International American conference to visit certain sections of the south. It should be generally and widely known the present arrangement is that early in January an itinerary will be arranged for the south, relatively more extensive than is now in progress in the north. This announcement is made on the authority of Secretary Blaine.

Call and See.

Mrs. Leyson, the medium and mental physician at Penn Block. Take your pictures and ores and see what she can do with them. She is one of the greatest mind readers of the day.

It is astonishing how rapidly the feeble and debilitated gain strength and vigor when taking Ayer's Sarsaparilla. For what are called "broken-down constitutions," nothing else has proved so effective as this powerful and perfectly safe medicine.

Cough! and Cough!! and Cough!!!

What in the world is the reason you will cough and keep coughing and still keep trying inferior medicines when Boggs' Cherry Cough Syrup will positively relieve your cough at once? This is no advertising scheme, but an actual fact and we guarantee it. For sale by all druggists. R. S. Hale & Co., wholesale and retail agents.

Home Testimony.

HELENA, Oct. 7, 1887.  
I was suffering from an unusually bad cough, my lungs were sore and congested, and I could not get any rest. I had been told that Dr. King's Cough Syrup was the best, and I bought a bottle. I took it according to directions, and after taking it according to directions was completely cured. I therefore cheerfully recommend it.

JACOB SWITZER.

I had a racking cough and inflamed throat and bought a bottle of Ayer's English Remedy upon the recommendation of a friend, and was entirely cured by it. I consider it a never failing remedy for a cough.

F. F. FELDMEIER.

Ayer's English preparations are for sale in Helena only by R. S. Hale & Co.

When Bache was sick, he gave out Cough Syrup.

When she was a child, she used Dr. King's Cough Syrup.
